

GTK programming

Software Technologies - Lecture 5

Saurabh Barjatiya

International Institute Of Information Technology, Hyderabad

12 February, 2010

Contents

- 1 GTK
 - Introduction
 - gtk-demo

Introduction

- GTK stands for Gimp ToolKit
- It can be used for Gnome GUI programming
- GTK is released under LGPL license
- GTK uses glib which is portable C library.

gtk-demo

Sample codes are provided with lecture slides. Once you are comfortable with them use online documentation at <http://library.gnome.org/devel/gtk/stable/> to learn more about GTK programming

You can also use 'gtk-demo' and learn advanced things about GTK GUI programming.
